

Sarah Azimova

Note from myself

I have always loved creating things – whether through art, stories, music, ideas or small details that make people stop and feel something. For me, creativity is a way of exploring the world and expressing thoughts that are sometimes difficult to explain with words alone. I enjoy experimenting with colours, textures and different materials, often finding inspiration in nature, emotions, imagination and everyday moments people might not normally notice.

I like learning across many different subjects because I believe creativity can be found almost everywhere – in science, design, problem-solving, storytelling and even the way people connect with each other. I enjoy trying new ideas, asking questions and challenging myself to grow both creatively and personally.

Art makes me feel calm, curious and inspired. I hope that through my work I can continue developing my own style, sharing meaningful ideas and creating things that bring imagination, warmth and positivity into the world.

From my parents

"Our daughter Sarah is a kind, imaginative and thoughtful young girl with a deep love for creativity, learning and self-expression. She approaches the world with curiosity and sensitivity, often turning ideas, emotions and observations into art and creative projects. Whether through painting, storytelling, music or exploring new ideas, Sarah shows dedication, originality and a genuine desire to grow. Alongside her creative interests, she demonstrates strong academic ability, depth of thought, excellent communication skills and a natural enthusiasm for learning across a wide range of subjects. Growing up in a multilingual and multicultural environment, she enjoys connecting creativity with communication, curiosity and understanding of the world around her. We are proud of her gentle confidence, artistic spirit and determination to always create something meaningful and inspiring."

Clubs, societies and activities

- 2026 – Present – SWL Gymnastics, London, UK
- 2025 – Present – Student at Putney School of Art, London, UK
- 2024 – Present – Creator of the YouTube channel "Kitmova"
